

AirNugz 2200 / Filtered Air Purifier

Air Purification and Odor Neutralization for Large Greenhouses Cross Contamination Prevention AirNugz Filtration 2200 for Odorless Space.

- **Powerful for High Volume:**

The AirNugz 2200 is a true 2200 CFM with all filters in place. Its powerful 2 hp motor delivers a high volume air filtration for the larger spaces and greenhouses. The AirNugz 2200 is bigger and better.

- **Utilizes standard “Lay flat” or flex ducting:**

12” intake to 12” exhaust vacuum ports allows for maximum airflow with little restriction. Ducting can be used to exhaust filtered air outside or to bring in fresh air from outside.

- **Efficiency:**

The AirNugz 2200 is the most powerful yet portable filtration system engineered for critical air filtration and odor neutralization. By combining true DUAC filtration (Dual Activation) with our “Duac-Pure” three stage odor controlling filter, the Airganics AirNugz is the most efficient filtration system in its class.

- **Versatility:**

The AirNugz 2200 is used in a variety of applications ranging from odor and fume removal, air purifying, food processing, laboratory cross contamination prevention and containment of airborne pathogen for medical and hospital uses.

- **Virtually indestructible:**

The heavy duty roto molded box is leak proof and virtually indestructible.

- **Standard filters:**

24” x 24” x 12” Fill-Pure DUAC Honeycomb Filter (45 lbs of Dual Activated Media)

24” x 24” x 1” Fill-Pure Tri-Tek PreFilter

24” x 24” x 1/2” Fill-Pure MERV Filter

AirNugz 2200 / Filtered Air Purifier

Features

- Horizontal design with 4" casters for easy transport and placement
- Integrated molded carrying handles for easy lifting
- Caster nest for stackability when high air filtration volume required
- Extended filter life with super loaded DUAC filter made of 45 lbs of dual activated media
- Two speed air volume 1000 CFM and 2200 CFM
- Easy filter change with guillotine door and brackets
- Large 12" ducting intake door when required
- Dent proof and light weight

Benefits

- No installation necessary. Turnkey system. Plug and filter!!!
- Removes any organically generated odor via the DUAC Honeycomb Filter
- Exhaust clean odorless air after filtration
- Increase airflow in greenhouses
- Renew fresh clean air supply
- Portable and easily movable and transportable
- 2 speed switch permits user to adjust the air exchange rate
- Prevents cross contamination by odor
- Restore outside air quality inside any close space
- Air purification for food processing facilities grow area and laboratories

Air Exchange Calculation Formula For Your Space

(Width x length x height) of the room / BioKlean CFM output = minutes for complete air exchange

(_____ x _____ x _____) / _____ = _____ minutes for complete air exchange

60/ # of complete air exchange = # of air exchange per hour 60 / (_____) = _____ air exchange per hour

(CFM x 60)/ (W x L x H) = Air exchange per Hour (_____ x 60)/(_____ x _____ x _____) = _____

Model	Part No.	Weight	Dimensions	Air Volume	Power	Filter
AirNugz 2200	AN2200	135 lbs 61 kg	37" x 26" x 31" 94 cm x 66 cm x 79 cm	Variable 1000-2200 CFM 850-2200 m ³ /hr	115 Volt 15 amp, 60 Hz	DUAC V-Cell Tritek and MERV
AirNugz 2200	AN2205	135 lbs 61 kg	37" x 26" x 31" 94 cm x 66 cm x 79 cm	Variable 1000-2200 CFM 850-2200 m ³ /hr	230 Volt 8 amp, 50/60 Hz	DUAC V-Cell Tritek and MERV
